

Five-Year Warranty for Full Mouth Rejuvenation, Smile Makeover, Crowns, Onlays, and Veneers

The Warranty

Investment in *optimal health* is by far your wisest long-term decision.
At The Village Dental Center we strive to *exceed* your expectations

Q. How long will the bonded porcelain crowns or porcelain veneers or onlays last?

A. So many factors influence the longevity of dental restorations that our best estimates are simply that. Estimates!
However, it is our pleasure to offer you what we believe to be a unique value...

We warrant our restoration for a period of FIVE YEARS!*

Optimal health is only maintainable when provider and patient alike commit to a
JOINT PARTNERSHIP EFFORT...

OUR PART

*If *our* crowns, porcelain veneers, or onlays need replacement, and the tooth is still savable...as long as Dr Harmon maintains his private practice in dentistry...and you do your part (listed below) we will:

Replace any crown with a new crown of the same type

Replace any porcelain veneer with a new veneer

Replace any onlay with a new onlay

- For the First year at **no charge**
- For the second year at **20% fee**
- For the third year at **40% fee**
- For the fourth year at **60% fee**
- For the fifth year at **80% fee**

Note: If a veneered or onlay tooth is damaged to the extent that a crown is necessary, the remaining percentage of the fee originally paid for the veneer or onlay will be applied toward the crown. You will pay only the difference. **We cannot predict if and/or when gum or nerve treatments may be required. If needed, they would require additional fees.**

Your Part

Visit our office for a **minimum of 2** (4 if we've recommended due to gum condition) **times per calendar year for professional cleanings.** Note: Many of our patients still return to us after moving across the United States. If you move or visit here part time, yet have done the rest of your part (below), one professional cleaning and checkup in our office annually will be sufficient to maintain this agreement!

Complete (in our office) **all recommended treatment in the quadrant** (quarter of the mouth that the tooth is in), all within a one-year period. Gum infection and bacterial decay spread from tooth to tooth. Your path to optimal health requires a comprehensive approach to care.

Advise us of the need to **change or cancel appointments at least 48 hours in advance.** Failure to provide this notice to change an appointment or a failed/missed appointment will automatically void this warranty!
